Install steps (quick recap)

- **Windows:** run the .exe. If SmartScreen appears, click **More info** → **Run anyway**.
- **macOS:** open the .dmg → drag “The Gift Shop POS” to Applications → open. If macOS warns it's from an unidentified developer: right-click → **Open**, or run `xattr -cr "/Applications/The Gift Shop POS.app"` in Terminal.
- **First launch:** the app starts a **14-day free trial** — full features, no key needed.
- **Unlock:** after the trial (or any time), click Activate, enter the **email** from your checkout and your **license key** from Payhip → permanently unlocked.
- **No separate paid download needed.** The same installer works for trial and paid — the key is what unlocks it.

SmartScreen (Windows): “Windows protected your PC” on an unsigned installer is normal. If it appears: **More info** → **Run anyway**. Always download from this official link — never from third-party mirrors.
